# **WORKING GROUP ON PROFESSIONAL EDUCATION**

**IT FOCUSES ON ENHANCING THE EDUCATIONAL NEEDS OF PROFESSIONALS IN  
THE PRENATAL SCIENCES, INCLUDING ALL INDIVIDUALS INVOLVED IN HUMAN  
HEALTH AND RELATIONS.**

# AIMS & GOALS

01

## **Prioritize Educational Needs:**

One of the primary objectives of the working group is to prioritize the educational needs of professionals in the prenatal sciences. By identifying the gaps in knowledge and skills, the group aims to develop targeted educational programs to address these needs effectively.

02

## **Research Question Generation:**

The working group aims to foster research and innovation in the prenatal sciences by providing opportunities for MSc or PhD students. To accomplish this, the group will compile and regularly update a list of research questions that align with the current advancements and challenges in the field. These questions will serve as potential research topics for students pursuing advanced degrees.

03

## **Educational Module Development:**

: The group is committed to creating comprehensive educational modules suitable for various target populations, including professionals, academics, parents, adolescents, adults, and mature adults. These modules will cover a wide range of topics related to prenatal sciences, ensuring that knowledge and best practices are accessible and tailored to the specific needs of each group.

04

## **Educational Material Creation:**

In addition to the development of educational modules, the working group will generate educational materials such as textbooks, manuals, online resources, and multimedia content. These materials will serve as valuable references and tools to support effective learning and professional development in the prenatal sciences.

# AIMS & GOALS

05

## Organization of Educational Camps:

To promote hands-on learning experiences, the working group will organize and conduct annual educational camps. These camps will provide a platform for professionals, academics, and students to collaborate, exchange knowledge, and engage in practical activities related to the prenatal sciences. The camps will be designed to accommodate both online and onsite participation, ensuring accessibility for a broader audience.

06

## Membership and Collaboration:

The working group welcomes professionals and academia with a specific interest in professional education in the prenatal sciences. It also encourages individuals or organizations with prior experience in curricula development, knowledge organization, and dissemination to join and contribute their expertise. Collaboration among members will be fostered to achieve the group's aims and goals effectively.

### In Short:

Let's join hands with a spirit of trust,  
When we say yes, we mean it, reliable and just.

Collaboration is our guiding light,  
Openness and respect, shining bright.

With regular presence and being on time,  
We create an environment so sublime.

Our genuine interest fuels the fire,  
Compassion and care, lifting each other higher.

---

By pursuing these aims and goals, the working group on professional education in the prenatal sciences aims to make significant contributions to the advancement of knowledge, skills, and practices within the field.
